We would like to invite you to participate in the testing of our online game created to educate children and young people about cyber security.

With your help, we would like to test our solution and gather feedback on what we can still do better to make the game as relevant as possible for pupils.

We encourage you to take a look at the game materials available online at our website [cyber4schools](http://cyber4schools.com). There you will find the necessary information. If you decide to take part in the testing, please contact our team for details on how to register for the beta version.

PARTICIPATING IN THE PROJECT YOU WILL:

- HELP YOUR STUDENTS TO KNOW MORE ABOUT CYBERSECURITY!
- ENRICH YOUR LESSONS WITH ONLINE GAME!
- FIND PRACTICAL ADVISE ON HOW TO PROTECT YOUR DATA AND NOT LOOSE YOUR WORK!
